Integrates with other Zoho products like Zoho CRM, Zoho Creator and Zoho Flow.

The link between our items and the inventory module is a great feature for our purchasing department.

When converting to Zoho Books from another accounting software, this seemed a bit difficult but this process is never easy.

There are certain restrictions within modules (estimates/sales orders/invoices/payments) that make it difficult to edit transactions. In many ways this is good, but different from what we have experienced with other accounting software solutions.

Ease of use	Very easy rollout to the entire team	Streamlined expense reporting
Integrating invoicing with the CRM	Mobile app is a little clunky, especially when processing receipts.	CRM data flow can be slow sometimes.
Integration with other finance apps, not the greatest.
